cytoplasmic translation				amide metabolic process			
cytoplasmic translation	rRNA metabolic process	maturation of LSU-rRNA	aspartate family amino acid biosynthetic process	amide metabolic process			;
	cytoplasmic translational initiation	maturation of 5.8S rRNA	organic acid biosynthetic process	biosynthetic process biosynthetic process		cellula metabo	regulation of translational fidelity regulation of translational
peptide biosynthetic process	ribosomal large subunit biogenesis	amino acid biosynthetic process	gene expression	organonitrogen compound metabolic process metabolic process SRP-depend		process lent detoxifi	fidelity stoxification
	RNA processing	sulfur amino acid metabolic process	biosynthetic	metabolic process	cotranslational protein targeting		detoxification
